A Flexible Approach to Predictive Biomarker Discovery

Philippe Boileau[1], Nina Ting Qi[2], Mark J. van der Laan[1] Sandrine Dudoit[1], Ning Leng[2]

[1]University of California, Berkeley; [2]Genentech Inc.

Background

This is the background.

Variable Importance Parameter

The causal and statistical models.

Inference

Present semiparametric theory and estimator.

Simulation Study

Here are the results of our simulation study.

Clinical Trial Application

IMmotion 151 heatmaps.

Conclusions

Here are the important takeaways.

References

List of references.

Funding

Thank you for paying my bills.
